

# Care Management Plan 2016 – 2017

Peru

## About the Care Management Plans

This document explains the bigger picture of our projects in Peru and how the combined daily tasks of all of our volunteers help us to achieve long term goals. By following Task Lists, our volunteers work towards our Goals, through which we contribute to our Care Programme Mission which combined with our other projects, helps us to reach our Company Mission.

Here we will lay out the priorities, resources, monitoring tools and evaluation systems used to make our ambition a reality.

## Our Resources

### Human Resources

- Volunteers are of course our primary resource to achieve our goals. We welcome over 3,000 Care volunteers per year globally.
- The staff at our placements support and facilitate our actions
- Over 600 Projects Abroad staff members provide the structure we need for worthwhile projects.

### Physical Resources

- With over 50 Projects Abroad offices worldwide, there is always somewhere for volunteers to work together and share experiences
- We provide all necessary placement materials and regularly construct and renovate care centres.

### Online Resources

- Our Volunteer Resources Database shares thousands of ideas among our community
- The Care Database is used to track our projects all over the world
- Personalised MyProjectsAbroad webpages prepare each volunteer for their Care project.

### Financial Resources

- Funds for all of Projects Abroad's work come solely from volunteer placement fees. These are distributed via monthly budgets, to ensure fair allocation of funds for each destination.
- Occasionally the Projects Abroad community may send donations directly for a specific placement or project.

### Intangible Resources

- The good reputation of volunteers in local communities is what makes our work possible. This reputation has been earned over years of dedicated volunteer contribution.
- This is supported by the combined knowledge of our extensive staff network.

# Our Care Management Plan Goals in Peru for 2016-2017

The following goals have been selected from a list of nine by our local staff and partners. Each placement may be working on one or more of these goals. We try to put volunteers in the most suitable placement based on what we know about them. We provide workshops, training, volunteer guides and checklists for each of these goals.

## Promote Early Childhood Development

With the local government now focusing more efforts in this area, work is being done to fill the gap in early childhood education. Projects Abroad Peru is one of the founders of the Regional Early Childhood Network of Cusco. Using ECD checklists, we assess each child at our partner placements in the fields of physical, social, emotional and cognitive development, as well as target individuals who require the most help.

## Increase Literacy

Reading and writing are essential skills for every person to master. Building these basic skills at a young age can greatly increase a student's ability and interest later on. However, only 9% of eight-year-olds achieve the required competence level in reading and writing in the region of Cusco. Our first priority in Improving Literacy is to ensure all children have access to the essential resources for development. We do this by assessing each placement on a list of criteria designed to promote reading and writing skills, through our specially designed Literacy Rich Environment Checklist.

## Increase Numeracy

Counting is another essential skill for every person to master, and yet an even lower percentage of children aged eight in the region of Cusco reach the required competence level in mathematics. Giving children at kindergarten age a solid foundation on which to build their skills will give them a valuable head start when they begin attending school. We provide children the support and guidance to build on what they are learning in school, targeting in particular those that seem to be struggling.

## Improve English

English has undeniably become the global language for business and tourism. With Peru's booming tourism industry, knowledge of basic English from an early age can substantially increase children's educational as well as future employment prospects. Our volunteers, in particular native speakers, can offer invaluable help in introducing the children to English and improving their phonetics, pronunciation and grammar.

## Improve the Quality of Life for Those Living with Disabilities

In many countries around the world, specialist resources and facilities available to people living with disabilities remain very limited. Those with disabilities can face many difficulties and have severely restricted opportunities when it comes to specialised education and employment, impacting their quality of life. By providing individualised care and attention, we can give more specialised and worthwhile treatments to those most in need, through physical therapy, stimulating games and vocational training.

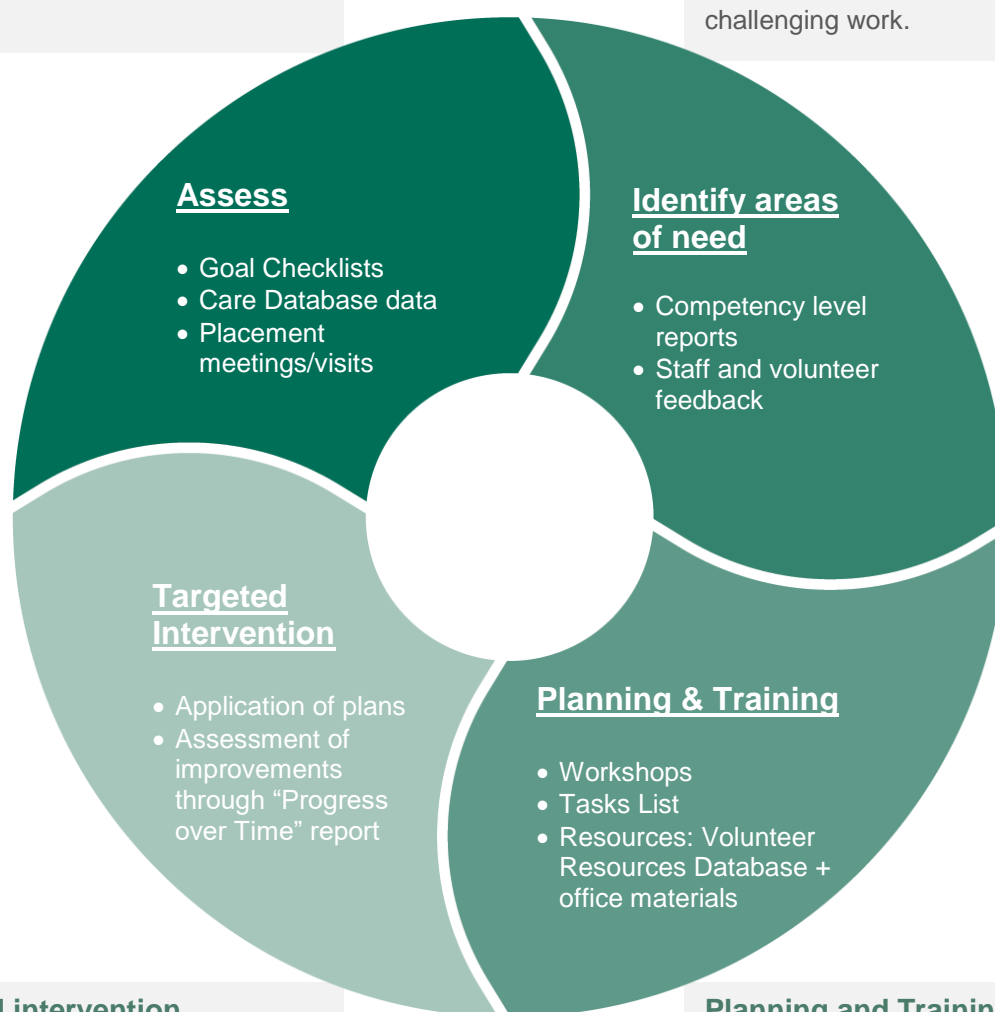

# How we achieve our goals

## Assessment

Through specially designed checklists, our volunteers assess the status of each child or placements in areas related to English, Numeracy, Hygiene and more on a daily basis. This information is uploaded to the Care Database through regular workshops with our team.

## Identify areas of need

Through our reporting system we can identify the areas that most need human or material resources. This helps volunteers to know which children are struggling so that they may conduct remedial classes; and also which students are ahead, so that they are given more challenging work.

### Assess

- Goal Checklists
- Care Database data
- Placement meetings/visits

### Identify areas of need

- Competency level reports
- Staff and volunteer feedback

### Targeted Intervention

- Application of plans
- Assessment of improvements through "Progress over Time" report

### Planning & Training

- Workshops
- Tasks List
- Resources: Volunteer Resources Database + office materials

## Targeted intervention

Through our steady stream of volunteers year round, we are continuously targeting the areas of need determined by our checklists. Although a 4 week volunteer might not see a tangible difference in the time they are there, we are able to show that over longer time frames each and every volunteer contributes to long-term, sustainable impact.

## Planning and Training

Based on the areas of need we create Task Lists, workshops and community days to direct our impact to where it is most needed. Resources are designed by volunteers and these are shared on the Volunteer Resources Database.
